Fully Responsive GP Practice Websites from webAdore

We pride ourselves on our attention to detail, ongoing support and website maintenance. From day one your website will evolve and be continually checked and maintained.

The rate of practices leaving us is virtually nil and we would be more than happy to provide reference practices should you wish.

GP Practice Website Features

- Fully responsive website design which resizes and reformats automatically to suit desktop, tablet or mobile devices
- WCAG 2.1 AA Accessibility Standards Compliant (.gov regulation from Sept 2019)
- Secure forms (with notification, login and collect, rather than sending insecure emails)
- Many pre-written forms including: QOF collection for BP, FAST Alcohol, Asthma, etc.
- Simple to use editor
- Quick-link options for online Appointments and Prescriptions
- Non-advert based in-site search
- Language translation for all pages
- Local OpenStreetMap integration
- GDPR approved Cookie widget
- NHS Local Services and Conditions and Treatments links
- HTTPS secure website
- Quality fast website hosting
- Annual website review. We check for inconsistent page formatting and correct. We also remove any old documents, check for bad links to external websites and report back to the practice.
- GDPR Data Processing agreement for practices who process forms

Background

Our websites have been around since 2007 and are written and maintained by a long serving Practice IT Manager who understands GP Practice website requirements. The original website design was written around 2000 in collaboration with GP Practices in Somerset.

Setting up your new website

Build

We put together your fully responsive website using content from your existing website or practice booklet.   We also note your clinical system and add any logos and images.

Check

We provide a breakdown, in page navigation order, detailing all changes made during the build process. You can then check your newly built website and make any final edits using our website editor, or you can email any changes to us and we will complete for you.

Publish (Go-live)

We can request an nhs.uk domain name, via the NHS DNS team, or you can use an existing domain. We then set up website hosting and publish. We also complete a whole host of admin tasks on the go-live day including setting up search engine optimisation and setting up Google Analytics.

Editing your Website

Editing your website couldn't be easier. Simply: Login

Enter your email address and password to login to the editor. A list of pages, which you are authorised to edit, will be shown. Note: selected pages can be authorised for different users. For example you might want to give access to just your PPG page to a member of your PPG.

Select the Page

Click the page you would like to edit and it will show in the editor.

Edit and Publish

Make your changes (as you would use Word for example). Once complete, click the **PUBLISH PAGE** button and you're done. There's also an option to preview your edit first. We provide full instructions for completing any advanced edits such as, linking to another website, or uploading an image, and are always on hand to help-out.

Website Accessibility

All our GP Practice websites comply with the latest WCAG 2.1 AA Accessibility guidelines as set out in the .gov Accessibility Campaign: https://accessibility.campaign.gov.uk/. We also offer checks and guidance to help you stay within the recommendations.

In-Page Site Search

We have integrated an in-site search routine called **SearchIQ** which has no adverts (unlike the Google Site Search). The database is continually re-indexed.

Clinical Systems, Forms and E-consultation integration

We can integrate your clinical supplier's online processes for viewing medical records, ordering repeat prescriptions, and for booking and cancelling appointments. We cover all clinical system such as EMIS, Vision, Microtest and TPP.

We also supply secure forms such as GMS1, GMS3, Health Questionnaire, Travel Questionnaire, PPG Application, Change of Details, Contacting the Surgery, The Friends and Family Test and many more.

If there's a form you particularly require, which we don't have in our catalogue, we can put that together for a small fee. Please contact us at **support@webadore.com** for a list of forms with example links.

We can also integrate E-consultation systems such as **eConsult**, **Engage Consult**, **AskMyGP** etc. If you use or are planning to use an E-consultation system, then we can add this free of charge to your website at any time. Example implementations can be provided on request.

So why are 'Responsive' websites so important?

Ask yourself two questions:

1) When viewing my current GP Practice website on a Smartphone, do my pages automatically resize so that page content can easily be read?

2) Can I see all the pages clearly on a Smartphone?

If the answer is no to either of these questions then your website is probably not responsive and patients will be missing out.

With the aid of Google Analytics, we're finding more and more patients are now using Smartphones to access GP Practice websites. Mobile access for some practices is now well over 50% of all visits and this trend only looks set to increase.

Pricing (per annum)

Practice Population	Price
0 to 3999	£400
4000 to 7999	£440
8000 +	£480

We do not charge any VAT so you can typically save around £80 to £96 per annum on our package verses those who do charge VAT.

We do not change for any set up costs and all conversion work is included.
